

GET READY FOR MIDDLE SCHOOL MATH!

GEF Summer School is pleased to offer this non-credit enrichment class to students now in 6th grade. This is a fun, interactive class to familiarize students with different ways to approach math. This is a skill building opportunity and will not affect math placement in the fall. Information at www.gefsummerschool.org

Students last year had this to say about the class:

“Helped me to understand math in a different way while having fun learning.”

“My favorite part of the class are the math games because it is really fun and it is in a way a break from all of the math. The games might contain mathematical thinking but they are mostly strategic and really fun.”

And parents agreed! One said that the class helped his student “100%” to be successful in 7th grade math.

Classes offered at Crescenta Valley and Glendale High Schools,

8 – 10:30 a.m.

June 17-July 2 or July 3 – July 19
